

Sell the **\$4.99 week pass** into panic windows (Sunday morning, waiver night), make that week feel like a win, then sell the **\$19.99 season upgrade** before the second weekly charge.

DAYS 0–2 · GATES. ZERO SPEND UNTIL ALL SIX ARE GREEN

- 1. **First-party events** for the funnel: landing → sign-up → league linked → paywall → checkout → paid (spec: docs/SPEC-ADMIN-METRICS.md).
- 2. **UTMs** stored on the account at sign-up and passed into Stripe metadata.
- 3. **Pixels**: Meta, Reddit, Google. Update the privacy page first.
- 4. **Resend on**. Email is dry - run today; unpaid sign-ups are unreachable.
- 5. **SMS opt-in box** at phone sign-up. Login numbers ≠ marketing consent.
- 6. **One real \$4.99 purchase** → cancel → refund, on a phone, in production.

THE THREE WEEKS

Week 1 · Find the message
NFL wk 4 · Oct 1–7 · **\$300**

- **Megathread grind** 90 min Thu/Sat/Sun: real answers + stamped card, no link unless asked. Read sub rules first.
- **Share loop**: every sign-up prompted to send the free Lock card to the league chat.
- **5 micro-creators** (10–50k): season pass for their league + \$50–100/video.
- **Google Search \$150**: "start sit week 4", "waiver wire week 4", "fantasy trade analyzer".
- **Reddit \$150**: conversation placement, 3 hooks head to head.

Week 2 · Scale the winner
NFL wk 5 · Oct 8–14 · byes begin · **\$600**

- **Retarget** linked-but-unpaid on Meta + Reddit (\$250).
- **2× the winning hook**; kill the loser; 3 new first lines.
- **Bye-week wire** creative, Tuesday night only.
- **Spark Ads** \$100–150 behind the best creator post.
- **Upgrade test**: in-app vs Monday email, "Season \$19.99, replaces your weekly."
- One genuinely useful r/FFCommish post.

Week 3 · Keep the machine
NFL wk 6 · Oct 15–21 · **\$600**

- Consolidate into the 1–2 channels **under target CAC**; cut the rest.
- **Referral test**: league-mate buys → you get a free week.
- **Deadline waitlist**: build the list for the November trade-deadline push (GM's Office).
- Write the learnings into docs/MARKETING.md: channel, CAC, hook, upgrade rate.

HOOKS TO TEST (STATIC + 9-SEC SCREEN RECORDING EACH)

A · Clock	"Lineups lock at 1:00. Your three moves are ready."
B · Pain	"Your bench outscored your starters again. Fix it in 30 seconds."
C · Product	Silent screen recording: link Sleeper → call sheet. Captions only.

FUNNEL TARGETS

Step	Healthy	Leak if under
Landing → sign-up	15%	8%
Sign-up → league linked	70%	50%
Linked → paid in 7 days	5%	2%
Week pass → 2nd week or season	50%	30%

THE WEEKLY CLOCK (ET)

When	Intent	What ships
Tue 8p → Wed 10a	Scouting	Email + Reddit: "Your 5 claims and what to bid."
Wed	Owned	Free public wire post, sign-up link at foot
Thu 5p → 8p	TNF lineup	Retarget linked-but-unpaid
Sun 8:30a → 12:45p	Depth chart	~60% of weekly spend · 9a email · 11a SMS (opt-ins)
Mon	Retention	No paid. Film email to paid users.

DECISION RULES (EVERY TUESDAY, WITH THE BACKTEST)

- **Target CAC** ≤ \$8 per first purchase (week nets \$4.38, season \$23.05).
- **Kill**: ad set spends \$16 with no purchase → off. No "learning" at this budget.
- **Scale**: under target 2 days running → +30% budget, never more.
- **Creative**: Mondays, cut the bottom half by CTR, clone the top half.
- **Leak first**: linked → paid under 2%? Stop spend, fix the paywall.

NEVER

- ✗ Betting or DFS words in ads (gambling ad category).
 - ✗ NFL or team logos.
 - ✗ Accuracy %, user counts, testimonials we don't have.
 - ✗ Free trial (delays revenue; refund guarantee already de-risks).
 - ✗ Broad cold Instagram, Product Hunt.
- Andrew decides:**

 - 1. \$1,500 budget, yes or a number.
 - 2. SMS marketing opt-in box.
 - 3. Creator comps + up to \$100 cash/video.
 - 4. Referral reward (a pricing change in edge/products.py).
